

IDE3-100-D480

Delta Connected Surge Diverter

The Novaris IDE3 is designed for protecting delta connected systems and is ideal for installing in main switchboards. The design utilises metal oxide varistors (MOVs) between phases and a hybrid MOV + gas discharge tube (GDT) between phase and earth.

Redundant Segments

Parallel redundant arrangement of high energy MOVs, promotes long life and exceptional surge handling capacity.

LED Monitoring of Redundant Segments

LED indicators are provided to indicate operating status of individual MOVs.

Active Alarm

External alarm allows remote monitoring of surge protection.

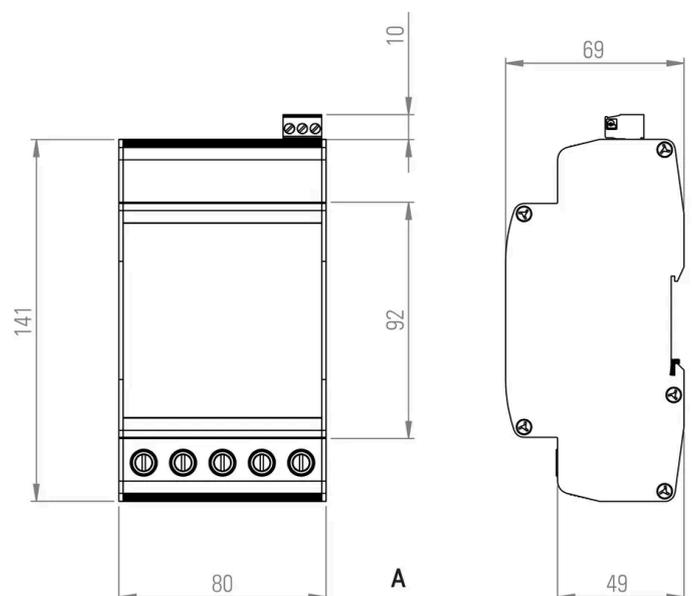

Safe Metal Enclosure

Surge protection is housed in safe, all metal enclosures. In the event of a prolonged overvoltage it will not catch fire or explode.

Image for illustrative purposes only

The colour of the grommets will change starting from 2026. All phases will be black, neutral will be black, and earth will be green
